- Odor** Highly odorous substances like fish oils solvents and certain chemicals are often banned from preceding foodgrade oils due to the risk of imparting undesirable flavors and aromas
- Toxicity** Toxic substances pose a significant risk to human health and the environment Their presence in traces can contaminate subsequent cargoes rendering them unfit for consumption
- 2 Reactivity** Certain substances can react with others causing chemical changes that affect product quality stability and safety
- Residue Difficulty** Some substances leave behind residues that are difficult to remove even with thorough cleaning procedures This increases the likelihood of crosscontamination

Realworld Examples and Case Studies

- Case 1** A shipment of sunflower oil was rejected due to traces of a previously carried cleaning solvent detected in the tank The importer suffered significant financial losses due to the rejection and the need to find a replacement shipment urgently
- Case 2** A shipment of soybean oil was contaminated with residual fish oil resulting in a strong fishy odor that made the oil unsuitable for human consumption This led to a recall impacting the companys reputation and leading to legal proceedings

These examples highlight the farreaching consequences of neglecting the Fosfa list

this book comprehensively examines the entire legal process of the international sale of goods beginning with the creation of the contract and continuing through to either the fulfilment of the sale or the termination of the contract every day goods are globally traded between sellers and buyers in different countries and different jurisdictions the distances between the parties involved in such transactions and the relative risks related to that are a key issue in international commercial sales sales of goods carried by sea thus differ quite drastically from domestic sales the goods will be normally shipped at a port very distant from the buyer preventing his physical presence at the port of loading further the goods will travel in the custody of a carrier a party normally quite independent from either trader finally transactions concluded on shipment terms are normally irreversible in the sense that shipping the goods back to the seller represents an unlikely option for the buyer traders around the world very frequently choose english law to govern their contracts with disputes to
