the new global climate of free enterprise has brought with it a proliferation of offshore financial centers that presumably have important roles to play in the emergent global economy the air of secrecy that appears to pervade the activities

of offshore financial centers may well slant or obscure any real understanding of the functions of such centers the authors investigate the role of major international accounting firms and their services in the processes of business facilitation in the locations that host these centers by focusing the investigation upon the role of the accounting firms in offshore financial centers the authors gain a better grasp of the real or potential impacts of the firms in the global economy and in the jurisdictions that host them not only do the authors provide a detailed assessment of what the major accounting firms are actually doing in the centers but they point out what attributes are needed by jurisdictions hoping to succeed as offshore financial centers the centers included are antigua barbuda the bahamas barbados bermuda the cayman islands the channel islands the isle of man gibraltar malta cyprus bahrain the united arab emirates mauritius the seychelles singapore and vanuatu the authors describe the legal and institutional environments facing business operations in general and the accounting firms in particular in offshore financial centers by studying these operations it should show what they are doing in terms of facilitating the international activities that flow through such centers it should also add to the understanding of the potential that offshore activities have as vehicles for development in small emerging economies this study should be of interest to a wide range of business disciplines as well as governmental agencies in advanced and emerging nations international agencies such as regional development banks and accountants and the international financial community

computer based systems have become omnipresent commodities within our vironment while for a large variety of these systems such as transportation systems nuclear or chemical plants or medical systems their relation to safety is obvious we often do not re ect that others are as directly related to risks concerning harm done to persons or matter as for example elevator control or mobile phones at least we are not aware of the risk in our daily use of them safecomp as a community and a conference series has accompanied this velopment for 30 years up to safecomp 2009 which was the 28th of the series during this time the topics and methods as well as the community have und gone changes these changes re ect the requirements of the above mentioned ubiquitous presence of safety related systems safecomp has always encouraged and will further encourage academia and industry to share and exchange their ideas and experiences after 30 years we as the organizers of safecomp 2009 found it imperative to take stock which methods found their way into the application areas which new approaches need to be checked for their practical applicability as di erent application domains developed their own approaches over the previous decades we tried to attract people with di erent backgrounds for this conference though the years 2008 and 2009 were not easy with regard to the overall global economic situation we succeeded with this

goal
